Year 2 - Knowledge Organiser – Information Technology

Key Facts

- Technology is any tool, device or system that helps us to do something or solve a problem.
- Information technology is technology that can create, store or exchange information.
- Text is the words and characters on a page.
- When you have lots of objects to count and compare, it helps to organise and record the data you find using a tally chart.
- A pictogram is a chart that uses pictures to display data.
- An attribute is a way to describe an object. We can group objects using different attributes.

Key Vocabulary

- Technology
- Digital device
- Text
- Font
- Text box
- Insert
- Drag
- Stretch
- Data
- Attribute
- Collect
- Tally Chart
- Pictogram
- Block diagram

These are not all computers but they are information technology.

Tally charts and pictograms

When you make marks on a tally chart, you chunk them into groups of five.

Block diagrams
