taste			
			
smell			

Amphibians - Live in water as babies and on land as they grow older.

Birds - Have a beak, two legs, feathers and wings.

Fish - live and breathe under water. They breathe through gills.

Mammals - Breathe air, grow hair and feed on their mothers milks as a baby.

Reptiles - Breathe air. They have scales on their skin.

Carnivore – An animal that mostly eats other animals (meat).

Herbivore - Only eats plants.

Omnivore - An animal that eats both plants and other animals.

Sight - Your eyes let you see all the things around you.

Hearing - Your ears let you listen to all the things around you. Your brain is able to tell what different sounds are.

Touch - Your skin gives you the sense of touch. You can tell if something is warm, cold, rough or smooth without looking at it.

Taste - Your sense of taste comes from your tongue. You can tell if it tastes bitter or sweet. You might have some tastes you like and some that you don't.

Smell - You smell with your nose.
